议程

- Play 1.x
- Play 2.x
- Play Good Parts
- Play Not so Good Parts
- Play Demo

PLAY 1.X

a Rails java clone

PLAY 2.X

- rewrite by Scala
- depress Play 1.x
- update Philosophy

PLAY 2.X 三大卖点

- Developer friendly
- Scale predictably
- Modern web & mobile

DEVELOPER FRIENDLY

- Hit refresh workflow
- Powerful console & build tools
- Type safety
- Built in testing tools
- IDE support for Eclipse and IntelliJ IDEA

SCALE PREDICTABLY

- Stateless Web Tier
- Non-blocking I/O
- Built on Akka
- Real-time enabled

MODERN WEB & MOBILE

- RESTful by default
- Asset Compiler for CoffeeScript, LESS, etc
- JSON is a first class citizen
- Websockets, Comet, EventSource
- Extensive NoSQL & Big Data Support

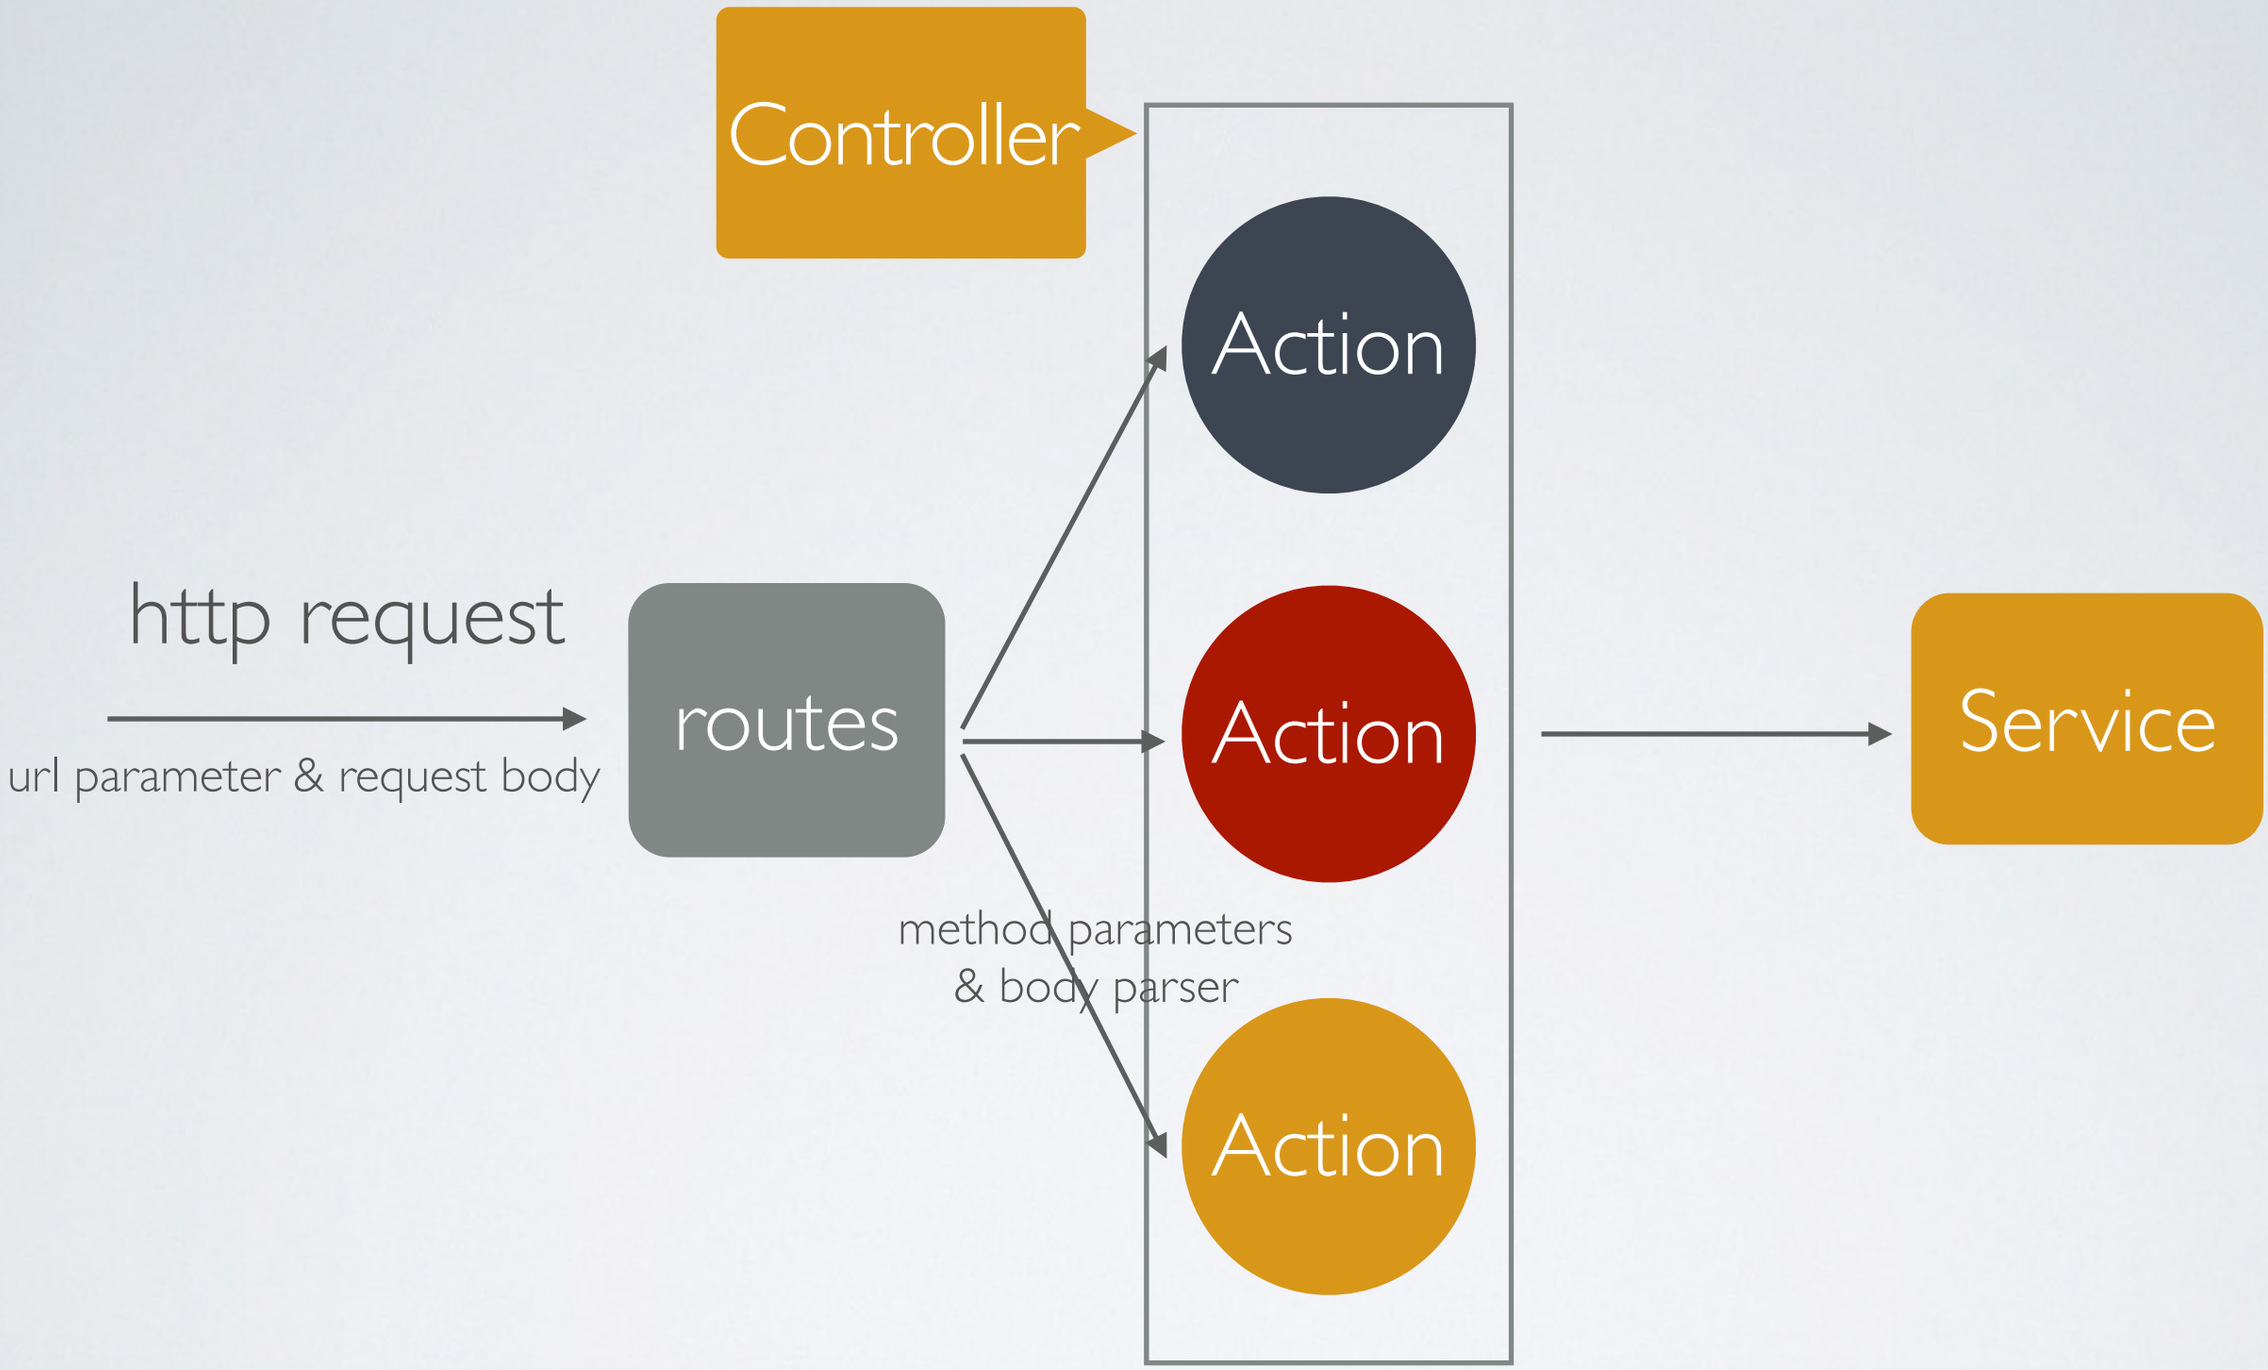
PLAY GOOD PARTS

- netty inside
- based on akka
- plain route but typesafe
- Json
- good document

NOT SO GOOD PARTS

- Template engine -> replaced in 2.3

- ORM -> plan replaced in 2.4



Request => Response

LET'S PLAY
